David Bradley, DVM, FASLMS graduated from UF in 1987. He has practiced for over 27 years in Mixed, SA, Equine, and Exotics with a special interest in surgery. Dr Bradley began using Lasers in private practice in 1999. Shortly thereafter, he began training and education in Laser physics and tissue interaction. He is a well-respected laser consultant and is a Fellow of the American Society of Laser Medicine and Surgery. Dr. Bradley's years of laser experience includes working with all the major Laser companies currently marketing to the veterinary community as well as many human companies. He has had the opportunity to use many different types of surgical, dental, aesthetic and therapeutic Lasers. He has consulted with dozens of Laser specialists and hundreds of veterinary and human physicians. Dr. Bradley has lectured nationally and internationally on veterinary laser use and will cover the science and practical application of lasers in veterinary medicine.
